Trade Solutions

Imports

Machinery - Construction and Civil Engineering - Finished product from Asia

IMP

LSL offers its customers development solutions and help to find suppliers and products located anywhere around the world.

We focus on importing European machinery, general merchandise from China and construction material from different countries, such as China, India, Malaysia and Vietnam. We have direct contact with several ceramic and porcelain factories, as well as bathroom accessories and boxes among others. Through our purchasing agents located in several cities in the Republic of China, LSL offers its clients the ability to import any product.

Exports

Agrifoods- Drinks - Food

EXP

LSL Trading is a division dedicated to the marketing of agriculture and various other products. This unit's ultimate goal is the international business development between America and the rest of the world. LSL has a team of international trade professionals, specialized in supply chain management, market research, purchasing and marketing. Our administrative headquarters in Buenos Aires is in constant contact with our agents around the world.

Importer and Exporter Services

IOR

Argentine companies face technical and operational difficulties in regards to officiating as an importer or exporter. LSL Group gives its clients the ability to export and import through our companies, which are created and managed for that purpose. Using a simple method, LSL makes an integral budget that covers: Transportation - Customs relating bank transfers - assessments and taxes - import and export services - and local logistics services.

Additionally LSL also offers IOR services, acting as an Importer of Record, possessing the stock in the country, and being able to send an invoice for the merchandizing of that stock to whoever the client determines.

Freight Solutions

Air

AIR

LSL offers its clients Air Transportation to and from any airport on the Globe, for all types of goods. In this case, we know that the delivery time is the most important for the customer, so through our business partnerships can provide excellent coverage and efficiency.

Ocean

SEA

LSL offers its clients maritime transport services for full containers (FCL) or consolidated shipments (LCL) covering almost all the world's harbors, and all kinds of goods. Our service is available for several types of containers.

Land

ROU

LSL offers its clients land transportation services for full truckloads (Full Track) and consolidated shipments (LCL) between Argentina, Brazil, Uruguay, Chile, Bolivia and Paraguay; in any possible combination. The service is offered for all types of goods and various types of containers and trucks according to each requirement.

Courrier

EXP

LSL offers its clients express air transportation for small packages. (Up to 250 kg in packages of no more than 50 kg each per air bill). We know that the customer's need in this case is urgency, so through our business alliances, we are able to provide improved services with our permanent care and knowledge of customs legislation, that ultimately mark the difference.

3

Customs Solutions

Definitive operations arrangement

DEF

At LSL we start by planning alongside the client and end with the entire dispatch online digitized and stored in our Secure Site, where the client at any time can view and download all the documentation.

Special operations arrangement

SPE

By focusing on the energy sector, our experience in OIL & GAS and Telecommunications enables us to provide the necessary counseling and care for our clients. Our adaptability allows us to sit down with our clients and develop customized solutions as may be required by the industry. We design the total solution; logistics, technology, finance and administration.

Temporary operations arrangement

TEMP

This service level must be arranged according to each productive process. LSL develops a file that the client may use in our online secure site, containing the entire history of their temporary imports, as well as a general listing, so that this can be used for tracing and also as a tool to contain updated information prior to a possible verification of destination inspection.
